Title: CW complexes and their topological properties

Speaker: Mr. Praphulla Koushik, IISER-TVM

Date and Time: August 5, 2020; 3:00pm

Venue: Google Meet

Abstract

An important class of topological spaces is that of spaces with "CW-complex structure." A topological space with a CW-complex structure is called a CW-complex. In this talk, I will define the notion of a CW-complex, give some examples of CW-complexes and present some topological properties of CW-complexes.
