

Title: Dynamics of product of nonnegative matrices

Speaker: Yogesh K. Prajapaty, IISER-TVM

Date and Time: October 14, 2020; 10:30am

Venue: PSB3103 and Google Meet

Abstract

Extending a well-known consequence of the Perron-Frobenius theorem on the periodic points of a nonnegative matrix to product of finitely many nonnegative matrices associated to a word, possibly of infinite length, we aim to understand the action of random dynamics generated by this finite collection. We will also discuss the subhomogeneous version of this question.
